The Organization will provide transportation and logistical support from Belgrade to Zlatibor. If you are planning to arrive on your own, please discover route details [here](#).

Time Zone & Climate

Serbia is located in the Central European time zone region GMT +1 and/or GMT +2 as of the last week in the third month until the Saturday prior to the last week of the tenth month.

The climate on Zlatibor is alpine and sub-alpine with typical characteristics. Summers are pleasantly warm with cool nights and winters are quite long and relatively strong with lots of precipitation.

Even though summer temperatures often reach more than 30 degrees Celsius they are quite bearable because of the presence of winds that intercross above the mountain in the so called ‘wind rose’ and together with products of coniferous pins have a salutary effect on the human organism.

What is especially significant and what sets Zlatibor apart from other mountain centers is exceptionally great number of sun-lit hours (insolation), on the average of almost 2000 hours per year.
